THE STUTE

Lights of Engineering.

“THE world is made up of all sorts of people,” and our Institute is a kind of small world in which the homely adage applies with full force.

“Tell us about a few of them,” you say? Why, certainly; that is what we set out to do.

For instance there is our friend who is good enough to patronize the place for a few years until he is old enough to take his place in the “Firm,”—that Mystery of Mysteries. He is to be recognized by means of certain blown-in-the-bottle marks:—by clothes of a remarkable, not to say striking cut,—wideness being the keynote,—by his rakish little cap, and so forth. See the cute little drop-stem pipe which graces his delicately curved lips! And how he digs his fists into his trouser-pockets and distends them until his hips are fully one yard, two and one-half inches across! What a prize-fighter he’d make, to be sure!

Yet we have seen him, once, avenging his injured honor by standing off his adversary for three three-minute rounds—we say “standing off” advisedly, for the two combatants never got any closer to each other than Albany is to Omaha. But when the referee called time in the last round, how he rushed at his adversary! What concentrated, uncontrollable rage he did display!

Once upon a time when he had four old conditions and six new ones, we had the temerity to suggest that he work a little and try to get rid of a few. A look came into his eyes such as we have seen on the face of the princely umpire when he has been hit by a ball in his center of gravity, and is trying to look unconcerned.

“*Me work?* What should *I* work for? I’ll get into our firm, even if I had forty ‘cons’.”

Ah! here comes the “athalete!” He of the mighty triceps and shrunken cranial development. See him stride along, accepting as his due the awed looks of the newly-made freshmen! No fripperies of dress for him, no bright green ascots or suits of checkerboard design. He’s in training now.

“What a chest!” says a youngster. “He must weigh considerable!” says another. And, “Look at his head,” thinks the innocent onlooker. Somehow or other the thought strikes him that the “athaletes” seat of intelligence strongly resembles a seat in the auditorium—folding up compactly into a small space to afford a convenient place for a hat.

“Ah! How d’do Blank; have’nt seen you about lately.” That’s Blank, a pretty good sample of a large class of Blanks.

Most of them are taking a course in engineering, preparatory to going on the road with a new line of perfumes, or to taking a flyer in the dry-goods business.

Perhaps Blank really started off with the intention of working; but he has only succeeded in adding another block toward the paying of a certain warm thoroughfare. With a considerable load of "cons" he struggles through four years, graduates, gets his little M. E., and embarks in the insurance business.

And so on.

There, gentle reader, we have enumerated classes A, B and C of a list as long as the chinese alphabet.

"How do I know whether I'm in one of these classes?" you ask. Well, examine your clothes for symptoms of class A, your exclusively athletic hopes for B, and your professional intentions for C. If you can then catalogue yourself among those mentioned, and are contemplating a course in engineering, we will tell you what to do. Take the Hoboken Ferry from Manhattan, get off, walk up River Street to the North German Lloyd docks, take three steps forward, give the countersign, turn to the right and ask for a job as 'longshoreman.

As we have begun with a text let us end with one. If you are coming to this palace of learning for athletic fame, rest, or commercial instruction we can only say: "Don't."

For many are called, but most are frozen—out.

F.

Calendar.

REHEARSALS:—Orchestra, every Wednesday at 3 P. M., in Auditorium.

Mandolin Club, Mondays and Thursdays at 4.10 P. M., in Prof. Denton's room.

Glee Club, Mondays, Tuesdays, Thursdays and Fridays at 4 P. M., in Auditorium.

FOOTBALL PRACTICE:—Every day at 4.15 P. M. at the Castle Point Grounds.

LACROSSE PRACTICE:—Every day at 4.15 P. M. at the Cricket Grounds.

FRIDAY, OCT. 21.—Engineering Society: Paper and discussion—"Asphalt Pavements," in Hall of Carnegie Laboratory, 4.10 P. M.

SATURDAY, OCT. 22.—Varsity Football—Pratt Institute.

Prep.—Montclair H. S. Football, 9 A. M., at Montclair.

WEDNESDAY, OCT. 26.—Varsity—Trinity Football Game at Hartford, Conn.

SATURDAY, OCT. 29.—Practice Lacrosse Game, Greys vs. Reds, Cricket Grounds, 3.30 P. M.

Prep.—Pratt H. S., Football, Brooklyn, 3.30 P. M.

WEDNESDAY, NOV. 2.—Cane Sprees, Tie-Up and Tug-of-War, Institute at 1.15 P. M., Cricket Grounds at 2 P. M.

A Publicity Bureau.

IT has long been the feeling of some of the men who take great interest in the welfare of Stevens and its institutions, that the Institute is not receiving the prominence in the public press which its position in the engineering world would seem to warrant. We do not imagine that the Stevens athletic news is of as much interest to the public as is that of the very large universities, nor do we expect that the minute details of our training system or the gossip of rubbers or attendants will be exploited in the daily press; but we *do* believe that if the results of grammar school and high school games find a place in a paper's columns, surely the details and scores of the games played by Stevens Institute are worthy of a place there.

The fault lies with ourselves. If we will send in the news, the papers will be only too glad to print it. Two or three of the New York dailies devote a column to the doings of the colleges, how seldom does any mention of Stevens appear there! An alumnus of the Institute has suggested the formation of a Publicity Bureau which shall map out a scheme for supplying the papers with all kinds of news items about the Institute and which shall see that such scheme will be consistently followed. Some action of this kind is necessary; we owe it to the Stevens because the Institute deserves to be more widely known; we owe it to ourselves because,—well, is there anything more distasteful to a college man than to be compelled to explain where and what his college is?

Cane Sprees, Tie-Up & Tug-of-War.

It is planned to make this year's Freshman-Sophomore contests more interesting and elaborate than ever before. The committee of nine upper-classmen in charge suggests the following with reference to the Cane Sprees, Tie-Up and Tug-of-War.

1st. That the Senior Class continue the Stevens custom of appearing at the ceremonies dressed in fantastic garb.

2d. That the Freshman and Sophomore Classes each engage a band for the afternoon.

3d. That every student in the Institute be ready to take his place in the parade, which leaves the Institute at 1.15 on the afternoon of Wednesday, October 26.

The contests will be fought out under the usual conditions. Judging from the indications of class feeling that both classes have already given, there can be little doubt that the rivalry at the Cricket Grounds will be keen and spirited.

Unfortunately we go to press too early to include an account of the Rag-Baby Rush in this number.

Faculty Notes.

The International Congress of Arts and Sciences has been in session at St. Louis during the summer. At a meeting of the Mechanical Engineering Section, held on September 23rd, Prof. Denton presided in place of Pres. Humphreys. Prof. Denton delivered a paper entitled, "The best Economy of the Piston Engine at the Advent of the Steam Turbine," which, while descriptive of the principal types of turbines now in use, also gave a history of the reciprocating engine and stated the limits of that engine's development. Mr. E. D. Estrada '83 acted as secretary to Dr. Denton.

President Humphreys has presented \$5000 to the Institute to be used in founding a scholarship in honor of his second son. It will know as the Crombie Humphreys Scholarship, the presentation of which is in the control of the President, subject to the conditions of entrance examinations.

The faculty has under consideration the adoption of a rule by which a student receiving a certain number of conditions, will immediately lose his right to attend classes. The position of the man to whom this rule would apply, would be identical with that of the man who now fails in a re-examination.

Work on the Annual Catalogue of the Institute for 1904-1906 is already under way. It is planned to have the catalogue ready for distribution by January 1st, 1905.

Prof. Ganz is planning, for the Senior Class, several short inspection trip to various alternating current power stations in and around New York.

Prof. Kroeh's optional (and additional) class in Spanish was organized on Monday, October 10th. The class started with 12 students who form the nucleus of what we hope is the first of a number of elective courses. The class meets at 4 o'clock on Mondays, Tuesdays and Thursdays.

CRUTHER, Captain of the Scrub, is doing excellent work. The fellows are coming out and are working hard; and, what's more, they're helping the team. The Scrub Team is being coached by J. K. Burton, formerly of Penna. State College, but now under Dr. Pond.

The Rensselaer Game.

On Saturday, October 11th, our team met Rensselaer Polytechnic Institute, at the Troy gridiron, in a football game that proved a hard fought battle. We suffered our second defeat this season, and yet our team showed the proper kind of *sand* and deserves much credit since their opponents outweighed them about 20 lbs. to the man. Almost all the gains were made outside of tackle; our line defense being all that could be desired. Our faith is strengthened as a result of the good work and we are looking forward to victories in the near future.

The line up was as follows:—

RENSSELAER.	POSITION.	STEVENS.
BENJAMIN	Right End	HAGEN
RIESE	Right Tackle	MUDGE
BRADBURY	Right Guard	CAFFREY
SCHLADEL, BAKER	Center	LEWIS
STILLMAN	Left Guard	COWENHOVEN
LAMB, MORGAN	Left Tackle	KALTWASSER (CAPT)
ROBINSON	Left End	COMSTOCK, JOHNSTON
ELMORE	Quarter-back	ROBERTS
YEAGER	Full-back	PRATT
FOGERTY	Right Half-back	PINKNEY
GIFFORD, (CAPT.)	Left Half-back	Mathews, Van Syckle

Stevens kicked off to Rensselaer's 20 yard line in the beginning of the game. Rensselaer played around our end for about 20 yards and then by steady gains, chiefly around our ends, brought the ball down the field until finally Fogerty made a touch down. Yeager kicked a goal making the score 6 to 0. Rensselaer in turn kicked off to our engineers who received the ball on the 20 yard line and made 40 yards good, by a series of steady gains, against their opponents' heavy defense. We then lost the ball on downs. Hard luck. Rensselaer again played hard for gains around our ends and Yeager put the ball over the line but failed to kick the goal. Score 11 to 0. Stevens' kick off. After three downs Elmore punted for 30 yards. Time called.

In the second half Stevens played a much better game. After kick off Stevens worked the ball up the field with good gains but finally lost the ball on a fumble. On the Stevens 5 yard line Rensselaer endeavored to kick but the ball was blocked. Kaltwasser, securing the ball made good a 35 yard gain. Pratt made good gains through the line, hurdling for 5 or 10 yards several times. The game ended without additional plays of interest; the score standing as in the first half, 11 to 0.

Throughout the game the individual men played well and after the last two weeks of hard practice we believe in them more than ever.

Class Notes.

1905.

The Senior Class elections which took place Wednesday afternoon, October 5th, resulted as follows :

President,	-	-	-	-	-	Roy E. Lynd
Vice-President,	-	-	-	-	-	C. M. Kaltwasser
Secretary,	-	-	-	-	-	L. A. Hillman
Treasurer,	-	-	-	-	-	W. O. Borchardt.

At the Senior Class meeting on Friday, October 7th, the following men were appointed to the Tie-up Committee : Scheel, Turner, Lydecker, Landvoigt and Gordon.

1906.

The Class-election held on Friday, October 14th, resulted in the election of the following :

President,	-	-	-	-	Morgan Farrell
Vice-President,	-	-	-	-	C. E. Cole
Secretary,	-	-	-	-	V. H. Mueller
Treasurer,	-	-	-	-	John Weber
Class Editor for "Link,"	-	-	-	-	W. W. Hill.

The new President immediately appointed the following men to act on the Tie-up Committee : Comstock, Elder, Anderson and Pratt.

1907.

Roy A. Demarest has been appointed Captain of the Class Lacrosse Team. The prospects for a good team are very bright, there being a number of last year's men still in the class.

G. A. Cowenhoven has been elected Captain of the Class Football Team.

On Saturday, October 15th, the '07 football team won a well played game from the Social A. C. of Newark, N. J. The score was 11 to 5.

1908.

Class-President Matthews has appointed the following men to act on a Class-Yell Committee: Ross, Cone, Drinkwater and Thayer. The result of their labors is the following:

Boom skid a boom, boom skid a-ki,
Racka tack, racka tack, racka taka ti;
Booma lacka, tacka lacka, tacka lacka-tate,
Boom rah! Stevens Tech. Class of '08.

The class football team is in need of heavy men.

Lacrosse.

THE fall practice has been moving along this week at a lively rate. However there seems to be the same old trouble as in other years; all the men don't come out regularly. Now it is up to every fellow to wake up and get out for some fun with us. We need a couple of heavier men for our defence. This does not mean, however, that we do not want light men. We need you all. During the ensuing weeks before the coldest weather we want two full teams out every day so that fall practice may mean what we hope to make it mean.

E. H. BEDELL, Manager.

The work of our lacrosse men, along the line of fall practice, took a more interesting form when, on Saturday, October 8th, they journeyed to Bay Ridge to play a practice game with the Crescent A. C.

Though the game was a little rough—several of our men meeting with accidents—it proved a valuable test for new men and gave new experience to the older ones.

Stevens stick handling was fair, yet never can a player be too accurate and sure in this line. Improvement in stick work is one of the important things we hope to gain through fall practice. The coach can make good team work, but it's beyond his power to teach a man how to coolly receive and deliver a ball, in a moment of excitement, without a miss. Keep at it.

The game was a good one. The teams started off with a snap, and soon Stevens, by good brisk passing and dodging, ran up three goals, putting the score 3 to 0 in their favor. The first goal was shot by Gayley on a pass from Demarest. The second was by McKinley and the third was Demarest's from Cole's pass. The Crescent's then woke up and ended the half by scoring two goals. O'Rourke tossing one and Parsons another. Making the score 3 to 2, our way.

In the second half we failed to score and our defence had a chance to play their game. The Crescent's made 4 goals during the half in spite of the excellent work of Deppeler at the net. Wall scored 2 goals for Crescent's, while Waddell and Gill got one each.

The line up was as follows:—

STEVENS.	POSITION.	CRESCENTS.
DEPPELER	Goal	ALLEN
ERLENKÖTTER	Point	DOYLE
CORREA	Cover Point	KERLEY
DAVEY	First Defence	MILLER
BUIST	Second Defence	DECASANOVA
HAMILTON	Third Defence	PARSONS
MURRAY	Center	LIFFITON
GAYLEY, SMITH	Third Attack	O'ROURKE
DEMAREST	Second Attack	YARLEY
MCKINLEY	First Attack	GILL
DAVIS (Capt.)	Outside Home	WALL
COLE, DRINKWATER	Inside Home	WADDELL

Referee:—Dr. Bell (C. A. C.) Goal Umpires:—Veysey (C. A. C.); Bedell (S. I. T.)

The second game with the Crescent A. C. took place last Saturday at Bay Ridge. The snap and vim displayed by the team in the previous game was notably lacking; the result being a larger score against us than before. Capt. Davis worked hard to get the team together but it was an off-day.

The first half was rather Crescent's way; they made five goals while Murray shot one for Stevens. In the second half the game was more lively. Helms and Davis each made a goal for Stevens while the Crescents succeeded in getting three more. The line up was as follows:

CRESCENTS	POSITION	STEVENS
DOYLE	Goal	DEPPELER
MILLER	Point	ERLENKOTTER
WALL	Cover point	CORREA
DE COSONOVA	1st defence	HAMILTON
KERLEY	2nd defence	BUIST
PARSONS	3rd defence	ROBERTS, SMITH
STOBA	Center	MURRAY
O'ROURKE	3rd attack	GAYLEY, HELMS
WARDELL	2nd attack	DEMAREST
HODGES	1st attack	MCKINLAY
GILL	Outside home	COLE
WILSON	Inside home	DAVIS

Goals in first half:—O'Rourke, Wardell, Hodges 2, Wilson, Murray. Goals in second half:—Wall, Hodges, Wilson, Davis,

Helms. Referee:—Dr. Bell, (C. A. C.) Umpires:—Scofield, (S. I. T.), Mr. Veysey, (C. A. C.) Time keeper:—Lydecker, (S. I. T.).

On Saturday Oct. 22nd there will be another fall practice game between the Greys and the Reds (two teams picked from Stevens players) at the Cricket Grounds. Admission free.

A meeting of the Executive Board of the S. I. T. A. A. was held on Oct. 11th. The Board awarded the ^AS^A to the following men:—Lydecker and Buist of '05; Hamilton '06; Bennett, Helms, Scammell and Demarest of '07. A motion to appropriate funds for a football practice dummy was carried.

The Musical Clubs.

It is desired to particularly call the attention of the underclassmen to the Orchestra. A good number of its members have been graduated last year out of either the front or back door and this leaves many positions vacant which must be filled. Anybody who plays any sort of a musical instrument stands a good chance of getting on the orchestra. Members of the clubs derive a great deal of enjoyment out of them. Trips are taken during the winter all over New Jersey and concerts are given by the clubs, which are often followed by dances. Thus a large field of social enjoyment is opened. Now the Orchestra is the easiest of the clubs to play on. Less work at home is required of its members and less work at rehearsals. Only one rehearsal a week is held and none of the selections are committed to memory.

Applicants hand names to Hegeman, '05. Rehearsals are held every Wednesday at 3 o'clock in the Auditorium. Use the door to the Auditorium, leading out of the Janitor's room. If you do not hand your names in, appear at the next rehearsal with your instruments. We hope that this notice will meet with a ready response.

HEGEMAN '05,

The Mandolin Club practices have been very well attended and a decided interest seems to be shown by every man. If the same interest is shown in the future there will be little or no "weeding out" after the Smoker. In picking out the music the leader encounters considerable difficulty. The music must be "catchy" but not so popular that it will die out in a few months. The club is now practising on two pieces which seem to have the necessary qualities: "Karama" and "Selections from the Isle of Spice." A bright future for the Club is looked for. This would be assured by the addition of a few more guitars.

Rehearsals Monday and Thursday at 4.10 P. M. in Professor Denton's room.

DEPPELER, Leader.

The Glee Club starts this season with last year's enviable record to surpass. Although still very early in the season, the club is in fairly good shape after six rehearsals. Eighteen of last year's club are in college and with the support of the sixteen men from 1908 the outlook is very promising. It must be remembered however, that in order to have a good club, *every* man must come out to *every* rehearsal and work hard. Without this the club can amount to nothing. It is to be remembered also, that in order to make the club, a man must attend at least sixty per cent of the rehearsals. Notwithstanding the good support which 1908 has given the club, we still need first tenors, and we need them badly. Let every man who reads this, ask himself if he can sing first tenor, or if he knows anyone who can. If he does let him come out at once, or persuade the other man to do so. Rehearsals are held in the Auditorium at 4 p. m., on Monday, Tuesday, Thursday and Friday of every week.

SCOFIELD '06, LEADER.

Prep. Notes.

The Prep's deserve great credit for the way they have been playing football this season. There has been some trouble with the schedule. The first game took place on October 4th, at the Cricket Grounds, against the Plymouth A. C. Our team slightly outweighed the visitors and found no trouble in getting through them for large gains, scoring three times in the first half. In the second half Coach Hendrickson gave some of the scrubs a chance to show what they could do. In spite of this reduction in weight Stevens still proved strong and ran the score up to 29-0. Toward the end of the second half the ball went to Plymouth on a fumble. They braced and succeeded in getting three quarters of the way down the field when time was called. This was the nearest they ever got to a goal. F. Smith, Groel and Kilgore made the touchdowns and G. O. Smith and Winans kicked the goals.

The game with Jersey City H. S. scheduled for Saturday, October 8th was called off. They also cancelled the game for the 15th. This puts Jersey City out of the game as the school is tired of fooling with them.

On Wednesday October 12th the Preps defeated the Hackensack H. S. team on their own grounds by the score of 11-0. The halves were twenty and fifteen minutes long. The Preps kicked off and got into the game with a jump. The Backs did excellent work through tackle and around the ends. Interference was good and in general the team seemed to be in excellent trim. The line was exceptionally good on the offence. F. Smith and Winans made the touchdowns.

The school plays Montclair High School to-morrow and there ought to be a good delegation of rooters.

The game with Webb Academy which was scheduled for Thursday, October 27th has been cancelled.

Next Saturday we play Pratt High School.

The Engineering Society.

At the first regular meeting of the Engineering Society, held October, 7th, plans for the ensuing term were discussed with successful results.

There was appointed a committee on Engineering news, whose members are to report briefly any interesting facts which come to their notice through the various periodicals of the engineering world. The work of this committee of which I. R. Lewis is chairman, is not limited but on the contrary is to be general in its scope and open to any member who may desire to assist.

At the meeting this afternoon the first of a series of papers, by the members, on popular engineering topics will be read. The first paper will be by A. H. Potbury, whose work during the past vacation has been along this line. A general discussion on the paper is invited. Juniors and Seniors are welcomed.

Our Game with Trinity.

The date of our game with Trinity at Hartford has been changed from October 29th to Wednesday, October 26th. This change has been made at the request of the Trinity management in order that the game might be on the program of their new President's inauguration, which takes place at that time. President Humphreys has granted a leave of absence to the team on that date. The team leaves, via the New York Central, on Tuesday evening.

Passing along Rivington St., N. Y., one day, the writer was much interested in the appearance of a horse and wagon that stood waiting by the curb. The horse looked as if he had just escaped the clutches of Barren Island. His harness was patched together with bits of string and wire. The wagon looked to be falling apart. It also, was tied together, and nailed together in every conceivable fashion. It was thought that the driver of such an equipage must be worthy of attention. And he was! He was the typical jew, with bowed shoulders, long uncombed beard and hair, and clothes which looked as if they had been made for a man at least four times larger. He climbed laboriously into the seat, gathered up the ropes which served as reins, and said:

"String beans! Commence." Upon which "String beans" moved soberly off.

H.

Smokes.

As a matter of fact he never had much of a place in college life and I doubt very much if he will ever have a prominent place in the engineering world. I speak of the chap I heard of last year who, during his entire four years college course had been to the athletic field just once. Ma's apron strings I suppose. They're rather handy things to keep a kid from falling but if he does'nt let go soon, they may strangle him when he grows older and tries to break away.

We become men, not so much because of any exact knowledge on tap in the brain as because of a something which the world calls good-fellowship. It's yours for the asking. Say "Good morning" to a fellow one morning and the next day he will say it to you. It's contagious; he can't help it.

I'm rambling a bit but come back to that fellow. The athletic field is but a place and the fellow but a type of mankind; but there is a moral.

It's a wise man who turns circumstances to good account. Here and now you have a chance to meet men, judge men and, better still, help make men. The chance comes on the athletic field, in college society and so on. It's the story of the other side of college life and if you miss it you're losing one chance to become master of your own destiny.

Mechanical Engineering means only part of our success.

"It's not birth nor rank nor state
But 'git up and git' that makes man great."

This and That.

DER DESERTED KOLLEDGE (A. D. 2004.)

Ach Stevens lofliest kolledge in der place,
 Where plenty of work cheers up der shtudent's face,
 Where shmiling spring ne'er dinks of coming round
 Till parting summer mit mud beschmears der ground.
 Der shmiling shteps so innocent und hard
 Seats of der youths you wore out by the yard.
 How often have I shtrolled across the green,
 ("Keep off der grass" could everywhere be seen ;)
 How often have I paused vhere e'er I'd shtop
 Yust to admire der swift Hoboken cop.
 How often have I blest der coming day
 Just ask my class-mates—listen vhat dey say.
 Sweet shmelling kolledge loveliest of dem all
 Where H₂S perfumes near every hall,
 Such vas it den, but now dot is not so
 Der sports have fled und also all der dough
 Ill fares der kolledge, to hasty ills a prey
 When grass is nourished vhere der men should play.
 My pipe is out, dis liddle tale is o'er,
 Yust vait a hundert years and you'll hear more.

V.

The Institute records show that three upper classes now have approximately 60% of their Freshman numerical strength. Freshman! Is a word to the wise sufficient?
